## About the Conference

The global surge in solid waste production necessitates innovative and eco-friendly solutions for sustainable development and management. This conference proposes an in-depth exploration of various approaches to enhance solid waste management by transitioning from conventional landfill practices to modern development strategies. The objective of the conference is to analyse and finalise a more sustainable approach to practice for efficient solid waste management to reduce adverse environmental impacts, exploring different ways to find solutions. It is also a step to discuss how individual and collective initiatives influence responsible waste disposal and further the role of market-driven mechanisms in transforming waste into valuable resources. The conference will also delve into the fact that policies can incentivize businesses and committees to adopt sustainable waste management practices.
