No suggestion

Not

There is nothing to improve

Media

...

Very good

Nothing

Give knowledge for interview

Use better graphics and visual media to engage students well Try
to reach every students and ask for their doubts

Make teaching a two way interaction

1) The college should provide a teaching schedule every semester to students and in that schedule it should tell about teaching days ,holidays, examination days (if possible as the exam are depends on mdu),etc. I am suggesting this because it would be very very helpful for each student to prepare better for exams.
2)The student can get books from the library at anytime whenever they want and also whether the classes are began or not for next semester. The no of books taken by a student should not be based on percentage of previous exam and every student can take minimum 6 books as usually 6 subjects are there in each semester.

Interaction

Good quality

more organised timetable
stable classes according to time

- Give equal importance to all..!
- Equal importance to academics and extra activities.
- No *misuse* of higher power/authority like HOD of taking the things personally...!

Dont take offline exam if you take online classes and we can't enjoy our collage life because we are take online classes

In lab classes teachers should explain it while performing, detail about intruments and also describe it throughly

Maybe do more offline classes rather than online ones, and also it would be helpful for the student's confidence development if my Institute organises more dance , singing, poetry, etc competitions.

No..because i am student and i don't have enough knowledge to give suggesion to my teachers

more understanding between teacher and students

1. Give offline classes
2. make classes regular

They must be updated with their syllabus
Make connections with students
Take class on time

Quality of teaching

1. Use better graphics.
2.Visual media to engage student well.
3.Try to reach every student and ask for there doubt.

Offline mode is better than online

Provide complete notes, take extra class for cracking ree exam

Vijayvanti mam not good

1. Use better graphics and visual media to engage students well.
2. Try to reach every student and ask for their doubts.
3. Make teaching a two way interaction.

Teachers should provide better opportunity to students.

College should provide good internet wifi connection to teachers.

Should focus on every individual
Communicate with all

1. First affol give the deep introduction about the subject .
2. Give introduction about the chapter .
3. Describe about all the topics clearly.
After that clear the doubts .

Giving rest period

Understanding, encourage, motivate

should open clg

1. Do not focus on exams only be serious about studies too
2. Start offline classes as soon as possible
3. Do not attempt online classes only for formalities

Already teaching good

Improve the overall teaching and learning technique

There should be practical courses like -personality development or other courses related to the field of students so that they get some practical knowledge with theoretical knowledge.
There should be better placement support and guidance.
And all teachers are efficient and good in their profession but some of them don't take their work seriously therefore I can give only one suggestion either to change their work or change them Thank you

Improve communication skills b/w teacher and student Start

offline classes

Be close with every student and help them with studies and motivate them , encourage them which makes students feel better and can improve their learning

1. Teachers should take regular classes and should explain every important thing.
2. They should not be bias. If a student is not able to understand something they should let them understand.
3. Rather then explaining with examples, they tell us to read pdf and make assignments which should not be done.

Give practical examples
Practical knowledge can easily understandable

Regular assessment, separately communicate with students,provide technology on regular basis

It's already very gud

1. Teachers should encourage students by checking their strength and weaknesses.
2. The internal exam should be satisfacory which encourage child to so more in coming exam.
3. The teachers should use projector or some means of teaching for more clarification.
4. practicals subject should be solved practically not orally.

Should be effective communication
Response should be there in any problem
Proper channel of communication
Information should be provided on time

Give us learning materials

Every student is eccentric and therefor should be handeled accordingly. Teachers should not have same approach for every student. No other advices , dav management is itself so vast , that it should think about these topics , by self

The teacher should motivate the students rather then demotivating them by saying you can't study don't waste your parents money infact they should ask the students why they are unable to pay attention and help them to figure out the solution for the same and teacher must be a good listener too. he/she should value the students point of view rather than overpowering them and showing them agression.they should also share their experience's and mistakes with the students.

teacher use different methods of teaching in online classes .

Interaction with students can be increased and co- curricular activities should be there

(1) be sure to take doubts properly, Only the few teacher's to take Doubt from the last 2 semester
(2) Motivate the students to participate in extracurricular activities .. because as soon as college Starts children stop participating In extracurricular activities
(3) one important thing is to give a break of 10 minutes after every period

More activities
Effected programs (for example:internships sessions, life changing motivation program)

1. Nothing to change
2. All teachers are good hearted person
3. Knowledge which is give by teacher's are helpful for the future...

Teachers should take the classes regularly and if they interact with the students in the way students needed then I think that the institution is turning to a superb extent!

1. Improve teaching-learning by developing communication between teachers and students
2. It can be improved by motivating or supporting and giving more chance to students to participate in extra curricular activities
3. It can be improved by taking small test between the syllabus covering time
4. Teacher should know the weakness of every students and help them to improve their weakness

More focus on weaker students

.....

Provide live examples , take the students out for trips to let them make their interest more in their course, give role plays or activities so the students could find it more easier to interact with the teacher

1. Use better graphics and visual media to engage students well. ...
2. Try to reach every student and ask for their doubts. ...
3. Make teaching a two way interaction

Try to reach every student and ask for their doubts.
Encourage active and practical learning.

Focus on practical knowledge and values, stress less environment, working with student on social issues

1. Teachers should use more and more LCD projector, multimedia etc.
2. Teacher should use diagrams, flow charts etc. While explaining the chapters. This will help the students to learn their syllabus in a better way.
3. There should be a PowerPoint presentation among students.

Very very good atmosphere at Dav college and their Good day in which we spent my time

1. Would like to go for offline classes.
2. Would like to go for offline activities.

Classes on time , some other activities like dance ,games and english speaking classes

1. Students Need more opportunities

lii

I dont know
I dont know
I dont know

Take tests regularly, Take more doubts of every student, inter act with each student By

understanding students problems.

-

Offline learning is much better than online one

Take regular classes.
Classes are done in offline modes.

as a student i don't think any changes to be done in teaching teacher are doing their best to teach us effectively

Improvement in explanation

teaching and learning experience in institution are:

Use better graphics and visual media to engage students well Try to reach every student and ask for their doubts Make teaching a two way interaction.

They sometimes are very effective in learning which improves our overall skills and communication.

All teachers are good

Offline classes arrangement
Time management to complete the syallbus
Doubt classes
